- ◆ Network communications: To obtain and maintain the required transmission lines and hardware for remote communications to and from the necessary agencies (to/from NJSP).
- ◆ Obtaining all required authorizations and permissions for connecting to New Jersey State Police (NJSP) AFIS. This includes establishing a network connection and user agreement with NJSP.

- ◆ Completion and return of IDEMIA pre-install documentation to IDEMIA Program Team.
- ◆ Printer supplies such as ink and toner cartridges (consumables) are Little Egg Harbor Police Department responsibility. IDEMIA does not offer or resell these items.

**IDEMIA's Standard  
Warranty and  
Maintenance support  
includes remote dial in  
AND on-site support  
services.**

### Assumptions

In developing this proposal, IDEMIA has made the following assumptions:

- ◆ Should Little Egg Harbor Police Department desire or require the ability to interface the proposed IDEMIA LiveScan with an RMS, IDEMIA will provide Little Egg Harbor Police Department an Interface Control Document (ICD) in which the Little Egg Harbor Police Department RMS vendor can use to ensure compliance for the interface. If it is determined that the RMS cannot meet the requirements of the ICD, IDEMIA can analyze and quote any specific development needs required to establish the interface between the proposed IDEMIA LiveScan and the Little Egg Harbor Police Department RMS.
- ◆ An inter-agency agreement between Little Egg Harbor Police Department and NJSP will be in place.
- ◆ Little Egg Harbor Police Department will provide all necessary communication to connect to NJSP. This includes, but is not limited to hubs, routers, modems, etc.
- ◆ *Existing Lexmark Optra R, Optra S, T5xx, T620, T630, T640, T650 Series Printers or Xerox Printers are not supported with the new Live Scan System. Please refer to Pricing Table 2 above for supported Printer pricing.*
- ◆ LiveScan System shipment and on-site Installation Services will be scheduled after network connectivity to NJSP has been established and verified and IDEMIA's Program team has received the completed pre-install documentation from Little Egg Harbor Police Department.

Installation is contingent upon Little Egg Harbor Police Department establishing a network connection and user agreement with the New Jersey State Police (NJSP). Little Egg Harbor Police Department shall be responsible for the purchase and installation of all necessary external communications equipment and electrical wiring of the facilities. Permission from the NJSP is required for access to their AFIS network.

The Mug Photo System interfaces directly with the Live Scan Booking System. Front and side profile mug shots are captured through the Live Scan Software and transmitted to the New Jersey State Police's mug shot database at the same time as the Tenprint fingerprint card transmission. These mug shots can then be accessed through SBI # from a CJIS terminal. The Mug Photo System features software-driven zooming (in/out) as well as an automated facial cropping feature with the option of manual cropping. The Mug Photo System allows for the capture of front and profile mug shots only (no scars/marks/tattoos) which are then transmitted with the electronic fingerprint card, stored in a New Jersey State Police mug shot database, and can be retrieved locally via the Little Egg Harbor Police Department CJIS terminal. An interface can be set up to store the mug shots locally; the majority of the work in setting up this type of interface will need to be completed by Little Egg Harbor Police Department IT staff. IDEMIA can transmit the ANSI/NIST records to a local Little Egg Harbor Police Department-specified email address/server in addition to sending the transmission to the New Jersey State Police. The extraction and storage of the mug shots from the ANSI/NIST records is solely the responsibility of Little Egg Harbor Police Department.

## Terms
